

Where the Extraordinary

is now the Ordinary

PLANETARIUM PATTY'S PLAZA offers you a walk through some of the latest observations in Cosmology, including gravitational waves. What are the implications of some of these findings, which support Einstein's extraordinary theory of gravity? Join Planetarium Patty herself, fresh back from a course with scientists from the Kavli Institute for Cosmological Physics on "Observing Einstein's Outrageous Universe", sharing what she just learned!

Monday, September 26, 2016

7:30 – 8:30 PM

FREE

Step up to the plaza for some more in-depth astronomy! Planetarium Patty's Plaza offers a few special planetarium nights designed to take you deeper into specific astronomical topics of interest. These nights are geared towards anyone with an interest in astronomy, structured as a lecture/Q&A session with some bonus night sky features!
