

CASSINI: Grand Finale

WHEN: September 15, 2017 at 7:30 PM

WHERE: Howard B. Owens Science Center Planetarium

End of Mission Goal: plunge the spacecraft into the atmosphere of Saturn, after taking many daring orbits that dive between the planet and its rings. Prevent contamination of the possibly habitable moon, Titan. Celebrate its historic 20 years in space by bringing in new science down to the last seconds of transmission. The journey ends September 15, 2017. Join us in commemorating the event.
