This new competition is designed to engage student’s creativity and encourage their participation in STEM education fields. Established by Members of the U.S. House of Representatives in 2013, this competition is a nationwide event that allows high school students from across the country to compete by creating and exhibiting their software application, or “app,” for mobile, tablet, or computer devices on a platform of their choice.

The “House App Contest” is open to all high school students (and all eligible to attend public high school) in Maryland’s 5th Congressional District. Students may work individually or in teams of up to four. All entries must be original in concept, design and execution. Students entering the competition must register in advance to show their intent to participate, and then submit their app’s source code along with a YouTube or VIMEO video that demos/explains their app and what they learned through this competition, by 11:59 PM EDT on APRIL 30TH, 2014.
