IMMUNIZATIONS

Although PGCPS will offer distance learning for the first semester, students must meet state immunization requirements within 20 calendar days of enrollment (Sept. 21). Immunizations during the pandemic are essential in maintaining overall health, especially during flu season. Starting next month, PGCPS will host free immunization clinics at multiple school sites to assist families with meeting immunization requirements. These services are offered in collaboration with the Prince George’s County Health Department and the Maryland Partnership for Prevention.

For more information, visit the PGCPS Immunization webpage.
