SIGNING UP FOR EDMODO

The first step to signing parents up is to provide the parents with the 6-digit Parent Code (this is not the same as a Group code). Each student has one unique Parent Code attached to his/her Student Account. Finding the parent code is easy for teachers and parents. You can print a list of Parent Codes for your group, and find it in two places:

- **On the Student’s Account:** The parent code is found on the bottom of the left side panel of a child’s Edmodo home page.
- **In the "Members" tab of a group:** Go to a group’s home page, click the "Members" tab, and click "More" > "Parent Code" next to a student's name.

Once the Parents have the parent code, they can then create their parent account with these simple steps:
1. Visit www.edmodo.com and select the “I'm a Parent” button, just below the student and teacher sign up buttons.
2. Fill out the registration form with the unique parent code, the relationship with the child and a valid email address.
3. Select the “Sign Up” button to complete the sign up process.

*Note: Once the parent has created the Parent Account, the parent is automatically observing any Group that the child is part of in his/her Account. A Parent Account allows you to see a limited view of your child’s activity. Any Group the child adds in the future will be added to the Parent Account as well. You can also provide parents with the Parent Sign Up Guide.*
